Rudra Kasturi Inc
AEO Auditor, Resource Auditor & Insights

Page Resource Audit

Analyze every JS & CSS file on your page. Find what's blocking renders, wasting your 2MB crawl budget, and what crawlers should block.

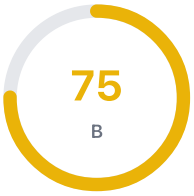
JS/CSS Audit | Render-Blocking Check | 2MB Budget | 1st vs 3rd Party | Crawler Block Advice | CWV Impact

HTML Mode — Static Analysis Only
Using provided base URL. Note: Resources loaded dynamically by JavaScript at runtime are not included — only what's in the raw HTML source. For a complete audit, use "Enter URL" mode.

Resource Audit for
https://www.cars24.com.au
06/03/2026, 12:36:12 HTML paste mode

HTML Size
1.09 MB

RESOURCE HEALTH



Good

Executive Summary

Your page loads 24 external resources. There are some optimization opportunities that could improve page speed and search engine visibility.

21 resources can be deferred to load after the page content appears, which would make the page feel significantly faster to visitors.

54% of resources come from third-party services. This is high — each external service adds load time and risk of downtime impacting your site.

0 Critical (Keep) | 21 Deferrable | 3 Removable | 0 Render-Blocking

TOP PRIORITY ACTIONS

#1
Remove 3 unnecessary scripts
Your page loads Facebook/Meta Pixel, Google Ads/AdSense that have zero impact on what visitors see. These only slow down your page.
High — directly improves page speed and Google ranking

#2
Move 985KB of inline code to external files
Large chunks of code are embedded directly in your HTML. This eats into Google's 2MB crawl limit and makes every page load transfer redundant code.
Medium — reduces HTML size and improves cacheability

#3
Audit 13 third-party scripts
Your page loads more third-party code (13) than your own code (11). Each third-party script adds latency, privacy risk, and dependencies on external servers.
Medium — reduces security risk and improves reliability

Google 2MB Crawl Budget 1.09 MB / 2.00 MB

55% of Googlebot's 2MB HTML crawl limit used. Inline JS/CSS count against this budget.

📦

21
Can Defer
Load after render

📜
985.1 KB
Inline Bloat
6 JS + 4 CSS

⚠️ **Heavy Inline Code Detected**

517.6 KB of inline JavaScript (6 blocks) is embedded in your HTML. 467.6 KB of inline CSS (4 blocks) is embedded in your HTML. This eats into your 2MB Googlebot crawl budget. Move these to external files.

🎯 **Quick Wins: 3 Resource(s) Can Be Removed**

These resources have zero impact on your content rendering. Removing them will improve Core Web Vitals (LCP, FID, CLS) and reduce page load time.

- Facebook/Meta Pixel (connect.facebook.net)
- Facebook/Meta Pixel (connect.facebook.net)
- Google Ads/AdSense (googleads.g.doubleclick.net)

Crawler Block Suggestions for robots.txt

Add these rules to your robots.txt to save Googlebot crawl budget. AI bots don't execute JS anyway, so blocking JS files won't affect them.

```
# === Resource Audit Suggestions ===
# Block 3rd-party scripts that waste crawl budget

User-agent: *
# www.google-analytics.com (Recommended)
Disallow: /plugins/ua/ec.js
Disallow: /analytics.js
# connect.facebook.net (Recommended)
Disallow: /signals/config/1594462310820300
Disallow: /en_US%20/fbevents.js
# googleads.g.doubleclick.net (Recommended)
Disallow: /pagead/viewthroughconversion/364722302/
# www.googletagmanager.com (Safe to block)
Disallow: /gtag/destination
Disallow: /gtag/js
Disallow: /gtm.js
# tracking.cars24.com (Safe to block)
Disallow: /static/DhPixel.js
# www.redditstatic.com (Safe to block)
Disallow: /ads/pixel.js
# d2r1yp2w7bby2u.cloudfront.net (Safe to block)
Disallow: /js/clevertap.min.js
# cdn.debugbear.com (Safe to block)
Disallow: /HtKj6e1uTAWw.js
# eu1.clevertap-prod.com (Safe to block)
Disallow: /a
```

Note: These are suggestions based on URL patterns. Test changes in Google Search Console before deploying. Blocking CSS files may cause rendering issues in Google's cached view.

Legend

Verdict

- **Critical** - Required for page rendering. Keep it.
- **Deferrable** - Can be loaded after initial render (async/defer).
- **Removable** - No impact on content. Safe to remove or lazy-load.

Crawler Advice

- **Allow** - Let crawlers access this resource.
- **Safe to Block** - Can be blocked in robots.txt without SEO impact.
- **Block Recommended** - Wastes crawl budget. Block it.

Why This Matters

AI bots (GPTBot, ClaudeBot, PerplexityBot) don't execute JS - they only see raw HTML.

Googlebot WRS executes JS but has a 2MB HTML crawl limit.

3rd-party JS wastes crawl budget and hurts Core Web Vitals.
